Welcome

Thank you for subscribing to my newsletter. I appreciate you taking the time to connect with me. You can expect updates, tips, and freebies from time to time. I would love to hear from you as well. I do try to respond to every email, so if you have a question, suggestion, or just want to say hi please feel free to email me directly at meredith@momgineer.com

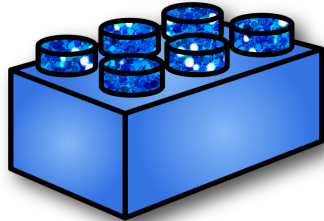

I hope that you find these STEM tower challenge cards useful, whether you are using them in your classroom, at home, in a makerspace, or a library. I have made these visual cards so that even your littlest budding engineers can get started with STEM.

Tips for Printing and Use

- Print in landscape.
- Use heavy weight paper.
- Laminate the cards so that they hold up over time.
- Use just one card at a station with the appropriate materials. Rotate the card and materials out when you want to change it up!
- Use the blank cards to write in your own challenge, or add a Velcro® sticky dot to a material and to the card, and stick one of your materials to the card itself.
